U.S. Citizen

EDUCATION

University of Wisconsin–Milwaukee

Bachelor of Science in Computer Science

Milwaukee, WI

Dec 2024

SKILLS

Languages: Java, Python, JavaScript/TypeScript, SQL, HTML/CSS, C

Frameworks & Libraries: Spring Boot, React, Node.js, Next.js, Django, SvelteKit, Tailwind CSS

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, API Gateway, DynamoDB, Cognito, CloudFront, IAM), Docker

Tools & Databases: PostgreSQL, MySQL, Git, Linux/Unix, Supabase, JUnit, TDD

EXPERIENCE

Software Engineering Prep Program

2024

CodePath - Partnership with Microsoft, Amazon

Remote

- Completed **50+ algorithm and data structure** challenges using **Python**, developing strong **problem-solving and debugging skills** through collaborative coding sessions and technical mock interviews with industry professionals

PROJECTS

Ora - Cloud Storage Manager | *React, Spring Boot, PostgreSQL, AWS*

[GitHub](#) | [Demo Video](#)

- Built full-stack cloud storage application with **Spring Boot REST API** for file upload/download using **AWS S3** pre-signed URLs and PostgreSQL (**AWS RDS**) for metadata storage
- Architected RESTful API endpoints for **CRUD operations**, implementing proper HTTP methods, status codes, and error handling for file management functionality
- Implemented **JWT authentication** using **AWS Cognito** with Spring Security filters to protect API endpoints from unauthorized access
- Deployed on **AWS EC2** with Nginx reverse proxy and **IAM roles** for secure credential management

Serverless URL Shortener | *Next.js, TypeScript, AWS Lambda, API Gateway, DynamoDB*

[GitHub](#) | [Demo](#)

- Built serverless backend using **Node.js Lambda functions** with **API Gateway REST API**, implementing URL shortening logic and redirect handling
- Designed **DynamoDB** schema with efficient access patterns for URL lookups, using single-table design principles for optimal performance
- Implemented **CloudFront CDN** for global content delivery and CloudWatch monitoring with custom dashboards for tracking function performance and errors

Collaborative Study Platform | *JavaScript, SvelteKit, Tailwind CSS, Docker, Supabase*

[GitHub](#) | [Demo Video](#)

- Developed full-stack learning platform with **5-person team in Agile/Scrum** framework, implementing real-time data synchronization using **Supabase**
- Implemented secure authentication and session management system using **Supabase Auth** with custom middleware
- Containerized application with **Docker** to maintain consistent development and production environments across team
